The portal home page is the starting point of the site. There are a number of ways that the home page can be customized by adding backgrounds, headers, logos, pages, directories, calendars, and sections.

The Portal Home Page

Background
Customize the site background by adding an image file or solid color. The background can either appear normal, full, or tiled.

Event Calendar
Add a homepage events calendar where events can be added or removed. An event can be ”featured” by being displayed in the calendar feature box on the home page.

Header and Logo
Add a header and a site logo file. The logo can be used on various parts of the site and may be used as the header.

Pages and Directories
Pages can be added to the home page and included on the navigation bar if to be viewed publicly. Directories can either be created for catalogs or posts. A page can either be a parent page or a subpage.

Sections
The homepage can be customized by creating sections, then moving those sections up or down on the homepage. They can be text & graphics, banners, feature boxes, posts, or catalogs.
